I. Inter.net US.

Inter.net US is a privately held corporation based in Reston, Virginia. It is a wholly owned subsidiary of Inter.net Global LLC ("Inter.net Global"), a provider of Internet access in sixteen countries.³ Inter.net Global describes itself as an ISP that provides individuals a borderless, global network to share ideas and common interests, and nurture and develop communities. As of October 2000, Inter.net Global had approximately 500,000 customers around the world,⁴ including 45,000 customers in

customers in Oklahoma, Alabama, Massachusetts, New

CONFIDENTIAL

Inter.net Global describes itself as being led by a seasoned management team with substantial experience in international management, finance and Internet technology.

In fact, several members of the team were responsible for

III. Conclusion.

Inter.net US has amassed a wealth of experience at responding to the needs of prospective subscribers. Vigorous competition can be expected to develop among ISPs as MISP service is rolled out across the TWC divisions. Approval of Inter.net US, and the Alternative Cable Broadband ISP Service Agreement that TWC has entered into with Inter.net US will provide consumers with the benefit of such vigorous competition.

We and AOLTW's representatives are available to meet with the Staff of the Federal Trade Commission to answer questions and provide further information in connection with any of the foregoing matters.

October 12, 2001.

Respectfully submitted,

CRAVATH, SWAINE & MOORE,

Robert D. Joffe
