2. Respondents object to the Requests to the extent that they require responses greater than, beyond the requirements of, and/or at variance to the Rules. In particular, Complaint Counsel's current and prior Requests well exceed the limit of 50 requests for admissions. Although there is no limit on the number of requests for admission as to the authentication of documents, more than 50 of Complaint Counsel's current and prior Requests do not fall into this category. For example, Complaint Counsel had repeatedly asked Respondents to admit that certain documents constituted a "complete set" of contracts with particular third party payors, thus requesting Respondents to admit that the contracts at issue were not amended or superceded. Currently, in more than 50 Requests, Complaint Counsel asks Respondents to admit that certain exhibits were actually furnished to private third party payors by an employee of ENH Medical Group despite the fact that the documents at issue do not reflect that they were "furnished" to any third party. Respondents' answers below are thus limited to addressing whether the documents at issue are authentic.

3. Respondents object to the Requests to the extent that they seek information that may be less onerously obtained through other discovery devices.

4. Respondents object to the Requests to the extent that they are vague and ambiguous in that they fail to adequately define the terms used in the Requests.

5. Respondents object to the Requests to the extent that they seek legal conclusions. For example, Respondents object to the Requests to the extent that they seek admissions that particular documents actually are admissible into evidence because such determinations must be made by the Court, not the parties. Complaint Counsel is really asking Respondents to admit that they will not object to the admissibility of particular documents. Such a request is not authorized under Rule 3.32 and, in any event, is premature given that the parties are in the midst

of discovery and pertinent documents have not yet been produced by third parties. Accordingly, all Requests should be deemed denied to the extent that they seek an admission that a particular document is admissible into evidence. Notwithstanding this general objection and denial, Respondents ultimately may agree before trial not to object to the admissibility of certain documents generated by Respondents that came from their own files, as well as certain other documents, as part of the proposed stipulations required under the Scheduling Order entered in this litigation.

6. Respondents object to the Requests to the extent that they seek admissions as to the authenticity of documents because discovery is ongoing and documents not yet reviewed as well as witnesses not yet interviewed or deposed may provide a basis to challenge the authenticity of one or more referenced documents. Accordingly, the information presently known to or readily obtainable by Respondents is insufficient to enable Respondents to admit or deny the authenticity of documents. Respondents thus reserve the right to challenge the authenticity of any document referenced in these Requests based on facts learned during discovery. Respondents, however, acknowledge that, under Rule 3.43(b)(2), documents produced by them from their own files that are addressed, or are identical to documents addressed, in the Requests are presumptively authentic and kept in the regular course of business. Notwithstanding this general objection, Respondents ultimately may agree to the authenticity of some or all of the referenced documents as part of the proposed stipulations required under the Scheduling Order entered in this litigation.

7. Respondents state that the documents referenced in each Request are subject to the Protective Order entered in this litigation.
