Richard B. Smith, Esquire
Federal Trade Commission
Premerger Notification Office, Rm. 398
5th Street and Pennsylvania Avenue, NW

I would like to discuss with you whether we are correct in concluding that the transaction described below is not reportable under the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

The transaction is essentially a spin-off through [REDACTED] with a corresponding reduction of the pre-transaction ultimate [REDACTED] interest in the entity controlling these subsidiaries [REDACTED]

The spin-off will consist of [REDACTED] will occur independently of any of the others. We therefore [REDACTED]

Edition, #70.

The two subsidiaries in question (S and S₁) are wholly owned by a holding company (HC). The voting securities of HC are held by an institutional investor (II) and two individuals (M₁ and M₂), in the following proportions: II = 60%, M₁ = 20%, M₂ = 20%. The structure can be visualized as follows:

Present Structure

The spin-off of S₁ and S₂ will be accomplished by forming a new company (N), whose shares will be held by II (@ 49%), certain managers of S₁ and S₂ (not M₁ or M₂) (< 1%) and

structure:

Post-Acquisition Structure

We think the resulting change in structure should not be reportable under the following analysis:

1. The acquisition of N shares by management shareholders (M_x), none of whom will at any time hold 50% or more of N's outstanding voting shares, and all of whom in the aggregate will have paid only \$150,200 for their shares, will be exempt under 16 C.F.R. 802.20.

3. The reduction of II's percentage of indirect

result of the transaction "the voting securities acquired do not increase directly or indirectly, the acquiring person's per centum share of outstanding voting securities of the issuer."

2/5/92 - talked to [redacted]. As to conclusion 2, pg 3, advised that, although underwriters are exempt under 801.60, if they are part of the [redacted] All these contributions should be included in N's [redacted] and they are [redacted]

(Staff note below) Also in conclusion 3, pg 3, (c)(10) is not acquisition since II will not control N and thus does not hold the voting stock of S₁ or S₂. The merger of NS₁ and NS₂ into S₁ and S₂ may also be reportable as acquisitions by N. RB Smith

1. The acquisition by II of 49% of N's voting securities, even if considered separately rather than as one step in a single transaction, would not be reportable. Such an acquisition is properly viewed as a step in the formation of N prior to the public offering, in which case the requirements of 801.40 will not be satisfied because none of the other acquiring-person managers will meet the \$10 million size-of-person requirement. See 16 C.F.R. 801.40(1)(iii). However, this would still leave the mergers of NS₁ and NS₂ into S₁ and S₂. Should the staff not agree with the analysis of paragraph 3 above, this merger would appear to be the only reportable event in the transaction.

Description of Transaction

This memorandum summarizes the proposed spin-off of S₁ and S₂ by P and the concurrent initial public offering of 1,000,000 shares of the common stock of N. It assumes that the value of S₁ and S₂ on a debt-free basis is approximately \$104 million. The transaction will be carried out in the following steps:

1. Management of S₁ and S₂ together with II (an

24.9% of which will be supplied by II in exchange for an equal

subsidiaries, NS₁ and NS₂.

3. Lender L will lend to S₁ and S₂ approximately \$46.3 million, the proceeds of which will be transferred to P in consideration for the release of S₁ and S₂ from its obligations

4. L will transfer to II approximately \$39 million principal amount of its note receivable from P under the Credit Agreement.

5. II will transfer to N the \$39 million note receivable from P in exchange for 49% of the N common stock.

6. N will issue 51% of its common stock to the public in an initial public offering ("IPO") for proceeds of approximately \$16.9 million before related expenses.

7. NS₁ will merge into S₁ and NS₂ will merge into S₂. S₁ and S₂ will each be the surviving corporations in the mergers. Pursuant to the mergers, P will exchange its interests in S₁ and S₂ for \$55.9 million, \$16.9 million in cash raised in

the IPO, \$20.3 million will be paid to L in reduction of the S₁

and S_2 debt created in step 3 (reducing that debt to \$25.0 million) and \$3.4 million will be used to pay expenses.

If more than \$39 million is raised in the IPO, the principal amount of the P debt obligation to be used by II to purchase N common stock will increase proportionately and the amount paid by NS_1 and NS_2 to P in the mergers will also increase proportionately.
