

# Does Regulation Drive Competition? Evidence from the Spanish Local TV Industry

Ricard Gil Mitsukuni Nishida

Johns Hopkins Carey Business Sc9093394e Sss Sc.4646332-288.637cmB

# Literature

- Regulation and competition:  
Joskow (1973), Samprone (1979), Armstrong and Vickers (1993), Vickers (1995), Danzon and Chao (2000)
- Static entry game:  
Bresnahan and Reiss (1990,1991,1994), Mazzeo (2002), Seim (2006), Jia (2008), Bajari et al. (2010a 2010b), Grieco (2012)
- Effect of regulation on entry:  
Grieco and Harmgart (2008), Schaumans and Verboven (2008), Cohen et al. (2010), Suzuki (2012), Nishida (2012), Datta and Sudhir (2012)
- Telecommunication industries:  
Berry and Waldfogel (1999), Goolsbee and Petrin (2004), Xiao and Orazem (2011), Crawford and Yurukoglu (2012), Gil and Ruzzier (2012)

# Spanish TV Industry

- Prior to 1980s, National Government-Owned: TVE and TVE2
- Early 1980s, Regional: At most two per region
- Mid 1980s, Municipals (= cities): local stations
- Late 1980s, National Privately-Run: Antena3, Tele5, Canal+

# Advertising in 2001

## Market for TV Advertising

<b>Market for TV Content</b>	<b>No Info</b>	<b>No Adv</b>	<b>Adv</b>	<b>Total</b>
<b>No Info</b>	<b>0</b>	<b>3</b>	<b>8</b>	<b>11</b>
<b>Broadcast</b>	<b>11</b>	<b>66</b>	<b>442</b>	<b>519</b>
<b>Pay-per-View</b>	<b>1</b>	<b>47</b>	<b>67</b>	<b>115</b>
<b>Total</b>	<b>12</b>	<b>116</b>	<b>517</b>	<b>645</b>

# Local TV Regulation in Spain

- Mid 1980s-1995: regulation for regional stations but no regulation for local stations
- 1st regulation: December 1995 law
  - ▶ Limited to the geographical boundaries to city
  - ▶ No more than two stations allowed per city
  - ▶ No network formation
  - ▶ Need to have local government personnel on advisory and executive boards (if private)
- "Silent" deregulation accelerates in 2000 after general election results (Badillo, 2003)
- 2nd regulation: December 2002 law
  - ▶ Number of stations proportional to population
  - ▶ No restriction on station ownership or network formation
  - ▶ No need for local government personnel on advisory and executive boards

# Two Major Political Parties

- PSOE (Partido Socialista Obrero Español): left-wing party, the industry needs to be regulated
- PP (Partido Popular): right-wing party, the industry needs to be deregulated
- Timeline
  - ▶ Before 1996: PSOE
  - ▶ 1996 election: PP with little support in congress (156 out of the 350 seats)
    - = Chose not fully enforce the law. The enforcement of the law is

# Timeline

# Number of Stations in 1995 and 1998

No Stations per City Year 1995	No Stations per City Year 1998									Total

Five Stations or More?	9627	0.004	0.065	0	1
Stations not HQ per City	9627	1.407	1.885	0	13
City Population (000)	9627	12.17	67.73	0.32	3016.79
City Growth	9627	0.04	0.11	-0.78	5.73
Province Population (000)	9627	1223.66	1363.04	56.93	5527.15
Province Growth	9627	0.03	0.03	-0.05	0.22
Unemployment Rate per City	9627	3.89	1.90	0	25
Cars per capita and City	9627	0.37	0.15	0.04	7.08
Bank Office per capita and City	9627	0.41	0.43	0	4.01
Province on the Coast?	9627	0.56	0.50	0	1

# Empirical Model

- Pro...t function

$$\ln N = \beta_0 + \beta_1 S(Y, ) + \beta_2 F_N(W, ) + u_i$$

where  $S$ : city population, province population, population growth

- Per-capita variable pro...ts

$$V_N = \beta_0 + \beta_1 X + \sum_{n=2}^N \beta_n X_n$$

where  $X$ : unemployment rate, # of cars per person, # of bank o¢ces per person

- Fixed costs

$$F_N = \beta_0 + \beta_1 W_L + \sum_{n=2}^N \beta_n X_n$$

where  $W$ : coastal province, geographical area, violation in 1995 law, violation and PP interaction, violation and PSOE interaction

# Estimation

- Probability of observing markets with no ...rms

$$\Pr(\bar{u}_1 \leq 0) = 1 - F(\bar{u}_1),$$

where  $F(\cdot)$  is cdf of  $u$  and  $\bar{u}_1 = \bar{u}_1 + u$ .

- Assuming  $(\bar{u}_1, \bar{u}_2, \bar{u}_3, \dots)$ , probability of observing  $N$  in equilibrium

$$\Pr(\bar{u}_N \leq 0 \text{ and } \bar{u}_{N+1} > 0) = F(\bar{u}_N) - F(\bar{u}_{N+1}).$$

$$S_N = F_N/V_N$$

# Conclusion

- How does policy enforcement affect firm behavior?
- We estimate entry thresholds across years and decompose them
- Data: Spanish local TV industry 1995, 1998, and 2001
- Findings
  - ▶ (1) Fixed costs are affected in 1998 and 2001
  - ▶ (2) Variable profits are affected in 2000
- Even a simple model can be informative about (1) how strongly the government enforces the policy and (2) the nature of the regulation enforcement
- The approach is useful for public policies of which enforcement and effect on the competition of firms are not obvious
