

UNITED STATES OF AMERICA  
BEFORE THE FEDERAL TRADE COMMISSION

COMMISSIONERS: Edith Ramirez, Chairwoman  
Julie Brill  
Maureen K. Ohlhausen  
Joshua D. Wright  
Terrell McSweeney

In the Matter of

HEALTH DISCOVERY CORPORATION,  
a corporation.

DOCKET NO. C-

COMPLAINT

The Federal Trade Commission, having reason to believe that Health Discovery Corporation, a corporation, has violated the provisions of the Federal Trade Commission Act, and it appearing to the Commission that this proceeding is in the public interest, alleges:

recognition technology to analyze specific characteristics (asymmetry, border, color, diameter and evolution) of digital images of skin lesions captured by the device's camera.

3. The acts and practices of Respondent alleged in this complaint have been in or affecting commerce, as "commerce" is defined in Section 4 of the Federal Trade Commission Act.

4. MelApp is a "device" within the meaning of Sections 12 and 15 of the Federal Trade Commission Act.

5. First sold in 2011, MelApp is available for purchase and download over the Internet through the Apple App Store and the Google Play Store. The retail cost of MelApp is \$1.99. U.S. sales of MelApp from January 2011 through July 2013 total more than \$17,000.

6. Respondent has disseminated or has caused to be disseminated advertisements and promotional materials for MelApp, including but not necessarily limited to the attached Exhibits A through C. These materials contain the following statements and depictions, among others:

- A. Screen excerpt from Apple App Store (Nov. 26, 2012)  
(Exhibit A, pp. 12)

Whether sunning on the beach, cheering at the kids' outdoor sporting events or hitting the slopes, chances are you're being affected by damaging UV rays. MelApp for iPhone is an image-based risk assessment mobile app that assists in the early detection of melanoma. Melanoma is the fastest growing cancer worldwide, and the most deadly of all skin cancers, if not caught early.

However, melanoma can be successful. rnbst mobile

- B. Screen excerpts from the Google Play Store (Jan. 31, 2014)  
(Exhibit B, p. 1, bracketed punctuation supplied)

Whether sunning on the beach, cheering at kids' outdoor sporting events or hitting the slopes, chances are you're being affected by damaging UV rays. MeApp for the Droid is an image-based risk assessment mobile app that assists in the early detection of melanoma.

Melanoma is the fastest growing cancer worldwide, and the most deadly of all skin cancers if not caught early. However, melanoma can be successfully removed and cured by regular skin screenings in its early stages. The disease is deadly in its most advanced stages as few treatment options exist. The median lifespan for patients with advanced melanoma is less than one year. Performing regular self-exams could save your life or that of a loved one.

Checking a mole or freckle is quick and easy:

(1) Use MeApp to take a picture of the skin lesions of concern with the phone's camera; fit the mole in the green circle and square by enlarging it

Checking a mole or freckle is quick and easy:

- 1.

Violations of Sections 5 and 12

11. The acts and practices of Respondent alleged in this complaint constitute deceptive acts or practices and the making of false advertisements or affecting commerce in violation of Sections 5(a) and 12 of the Federal Trade Commission Act.

THEREFORE, the Federal Trade Commission this \_\_\_\_\_ day of \_\_\_\_\_, 2015, has issued this complaint against Respondent.

By the Commission.

Donald S. Clark  
Secretary
