Community discrimination by railroads in the latter half of the nineteenth century resulted in legislative action to prevent the destruction of land and industry in one eres in fever of enother. The Interstate

Commerce Act of 1887 and the Sherman Act of 1890 as public necessities became a part of our federal law. The reports of the numerous public investigations made during that period are filled with flagrant examples of distributions.

roads for a number of years to the Standard Oil Company.

Outside of the field of public service, however, the individual trader was left free to fix his own prices under federal law. This did not prove to give complete protection to the public interest. Monopoly grew apace. The Interstate Commerce Act and the Shorman Act were found insufficient. Therefore, Congress in its consideration of the trade problems enacted the Clayton and the Federal Trade Acts in 1914. In so moving, the Congress acted only because public policy felt the necessity to prevent monopolistic pricing—indeed, to prevent pricing practices of individuals such as discriminations which were felt usually enhance the growth of monopolistic conditions. At that—

grade, quality, or quantity of the commodity sold, or that makes only due allowance for difference in the cost of selling or transportation, or discrimination in price in the same or different communities made
