Re: Unsubstantiated claims for Coronavirus prevention and treatment

Dear Drs. Wolfson:

This is to advise you that ~~TTC~~ staff has reviewed your websites at <https://thedrswolfson.com> and <https://naturalheartdoctor.com> December 2021. We also reviewed your social media website <https://www.facebook.com/TheDrsWolfson>

<https://www.youtube.com/user/TheDrsWolfson>, where you direct consumers to your website <https://thedrswolfson.com> and <https://naturalheartdoctor.com> to purchase products, including supplements. We have determined that you are unlawfully advertising certain products that or prevent Coronavirus Disease 2019 (COVID-19).

Some examples of Coronavirus prevention or treatment claims include:

- x In an email sent to consumers on August 27, 2021 with the subject line “Strategies Besides Ivermectin,” you state

“We are getting tons of emails about ivermectin. Does it work? Is it safe? What other options exist?”

First, it appears ivermectin works and is safe for most people.

But if you know me, I really don’t like taking out my prescription pad.

So here are 3 things YOU can do without a script to accomplish the same things as ivermectin.

1. Eat plenty of wild seafood and pastured meat. We love this source [affiliate link to <https://www.vitalchoice.com/>] for the best seafood and meat in the world. Also, get the chemicals out of your food by eating only organic.
2. Get sunshine and get sleep. Sunshine creates vitamin D and THIS may be the single best strategy for immune support. Sleep allows your body to recover. Make sure you get 8 hours.
3. Natural supplements will help do the same thing as ivermectin. Glutathione, zinc, vitamin A, C and D are all vital and help support  
(, (nh( We e u( We s(l)1t)-e o( (tin)3 (D 5 >Tj /T32 52D ))TJ[(f ( )-3 v (t)1.9rmo,)2.

This table demonstrates an 86% reduction in COVID infection among those who received ivermectin versus placebo

The authors of the above review conclude, 'The findings indicate with moderate certainty that ivermectin treatment in COVID provides a significant survival benefit'...

Conclusion:

Personally, I do not take ivermectin. If I still worked in a hospital or area with rampant sickness, I may change my tune. But I think nature support is always the answer. Ivermectin is still pharma. I trust nature.

To that end, I take my NAC every day. You can buy the best ~~brand~~ <https://shop.thedrswolfson.com/products/nac> here. 1 cap-2x per day is the standard dose. I suggest stocking up on NAC to <https://shop.thedrswolfson.com/products/nac>

Are you concerned about contracting viruses such as covid? Do you have loved ones who have had the J & J, AstraZeneca or really, any of the so-called

Read on to find out how you can help yourself and your loved ones, and share this information on a simple Japanese/common supplement.

What is Natto?

Natto is a traditional Japanese fermented soybean which has proven to be beneficial for health. The texture is slimy, sticky and stringy, but don't let that deter you as it's benefits far outweigh any opposition to it. Fortunately, we can also just take it in pill form. It is rich in nutrients including manganese, magnesium, potassium, zinc and more...

Natto and Covid

Scientists discovered Natto breaks down spike proteins on the surface of the Covid virus which prevents the virus from spreading within the body. It can also limit infections from other viruses.

In those who contract covid, elevated blood viscosity is the primary cause of thrombotic complications of Covid-19. Survivors of covid are at an increased risk for blood clots so using Nattokinase or our product called FLUO to <https://naturalheartdoctor.com/product/fluos/> a perfect way to include some powerful protection by keeping blood flowing well

Keep in mind that the J & J, AstraZeneca and the other gene therapy's to covid also produce harmful thrombotic reactions. Why? Because these jabs don't stay locally at the injection site. Instead, the components including the spike proteins (which are the toxin) make their way to the blood and build up primarily within your blood vessels (also in your organs). This equates to a very high risk for blood clots, strokes and pulmonary embolisms to name a few. If you know anyone who has gotten one of these, please share this information.

It is unlawful under the FTC Act, 15 U.S.C. § 562 et seq. to advertise that a product can prevent, treat, or cure human disease unless you possess competent and reliable scientific evidence substantiating that the claims are true at the time they are made. For COVID-19, no such study is currently known to exist for the products identified above. Thus, any coronavirus-related prevention or treatment claims for such products are not supported by competent and reliable scientific evidence. You must immediately cease and desist making all such claims.

You are also advised to review all other claims for your products and services and immediately cease and desist claims that are not supported by competent and reliable scientific evidence.

Violations of the FTC Act may result in legal action seeking a Federal District Court injunction.
