*Note: the estimated number of covered workers is calculated as 80% * (total employed population in the state); the estimated increase in total earnings is calculated as 0.86% * (estimated total covered earnings), where estimated total covered earnings is calculated as (estimated number of covered workers) * 572 (average annual earnings); and the estimated increase in average earnings is calculated as 0.86% * (average annual earnings). Total employed population and average annual earnings are taken from the U.S. Census Bureau Quarterly Census of Employment and Wages for 2022 (see <https://www.bls.gov/cew/data.htm>). National totals may not equal the sum of state-specific estimate
