- A post stating "Great information! Looks like the SAME probiotics strains and enzymes that are in my ProBio5 are being used to help treat COVID-19 symptoms. Almost all patients have shown an irregularity in their gut microbiota following treatment. Probiotics and pre-biotics are being used to avoid secondary reinfection.... #PlexusGetActive" next to an image stating "Some patients with COVID-19 showed intestinal microbialdysbiosis with decreasedprobtotics [sic] such as *Lactobacillus* and *Bifidobacterium*. Nutritional and gastrointestinal function should be assessed for all patients.Nutritional [sic] support and application of prebiotics or probiotics were suggested to regulate the balance of intestinal microbiota and reduce the risk of secondary infection due to bacterial translocation."
